

A group of four people (three men and one woman) are gathered around a white table in a modern office setting. They are smiling and looking at laptops. One man is standing and leaning over the table, pointing at a laptop screen. A white mug with the 'isd' logo is on the table. The background shows a bookshelf and indoor plants.

FROM TEAM EXTENSION TO FULL PROJECT RESPONSIBILITY

www.isd-soft.com

Struggling to find a reliable team to implement your project?

Facing difficulties in accessing top-tier technical specialists?

Looking for a team that goes beyond development, taking full technical and management responsibility?

WE CAN HELP!

ISD is a software development provider with offices in the Netherlands and a development center in Moldova, specializing in technology solutions for the industrial sector. We help businesses in manufacturing, logistics, intralogistics, and automation streamline operations, enhance productivity, and achieve digital transformation.

Our expertise spans custom software development, PLC automation, and mechanical & electrical engineering, delivering tailored solutions for industrial automation, smart manufacturing, supply chain optimization, and predictive maintenance.

18 YEARS EXPERIENCE

ISD has successfully delivered tailored software solutions across various industries: Intralogistics & Warehouse, Postal & Delivery, Real Estate & Engineering, Farm Management, Retail & E-commerce.

YEARS EXPERIENCE

OUR VISION

Driving innovation in the IT industry by delivering technical excellence, cutting-edge solutions, and transformative digital experiences.

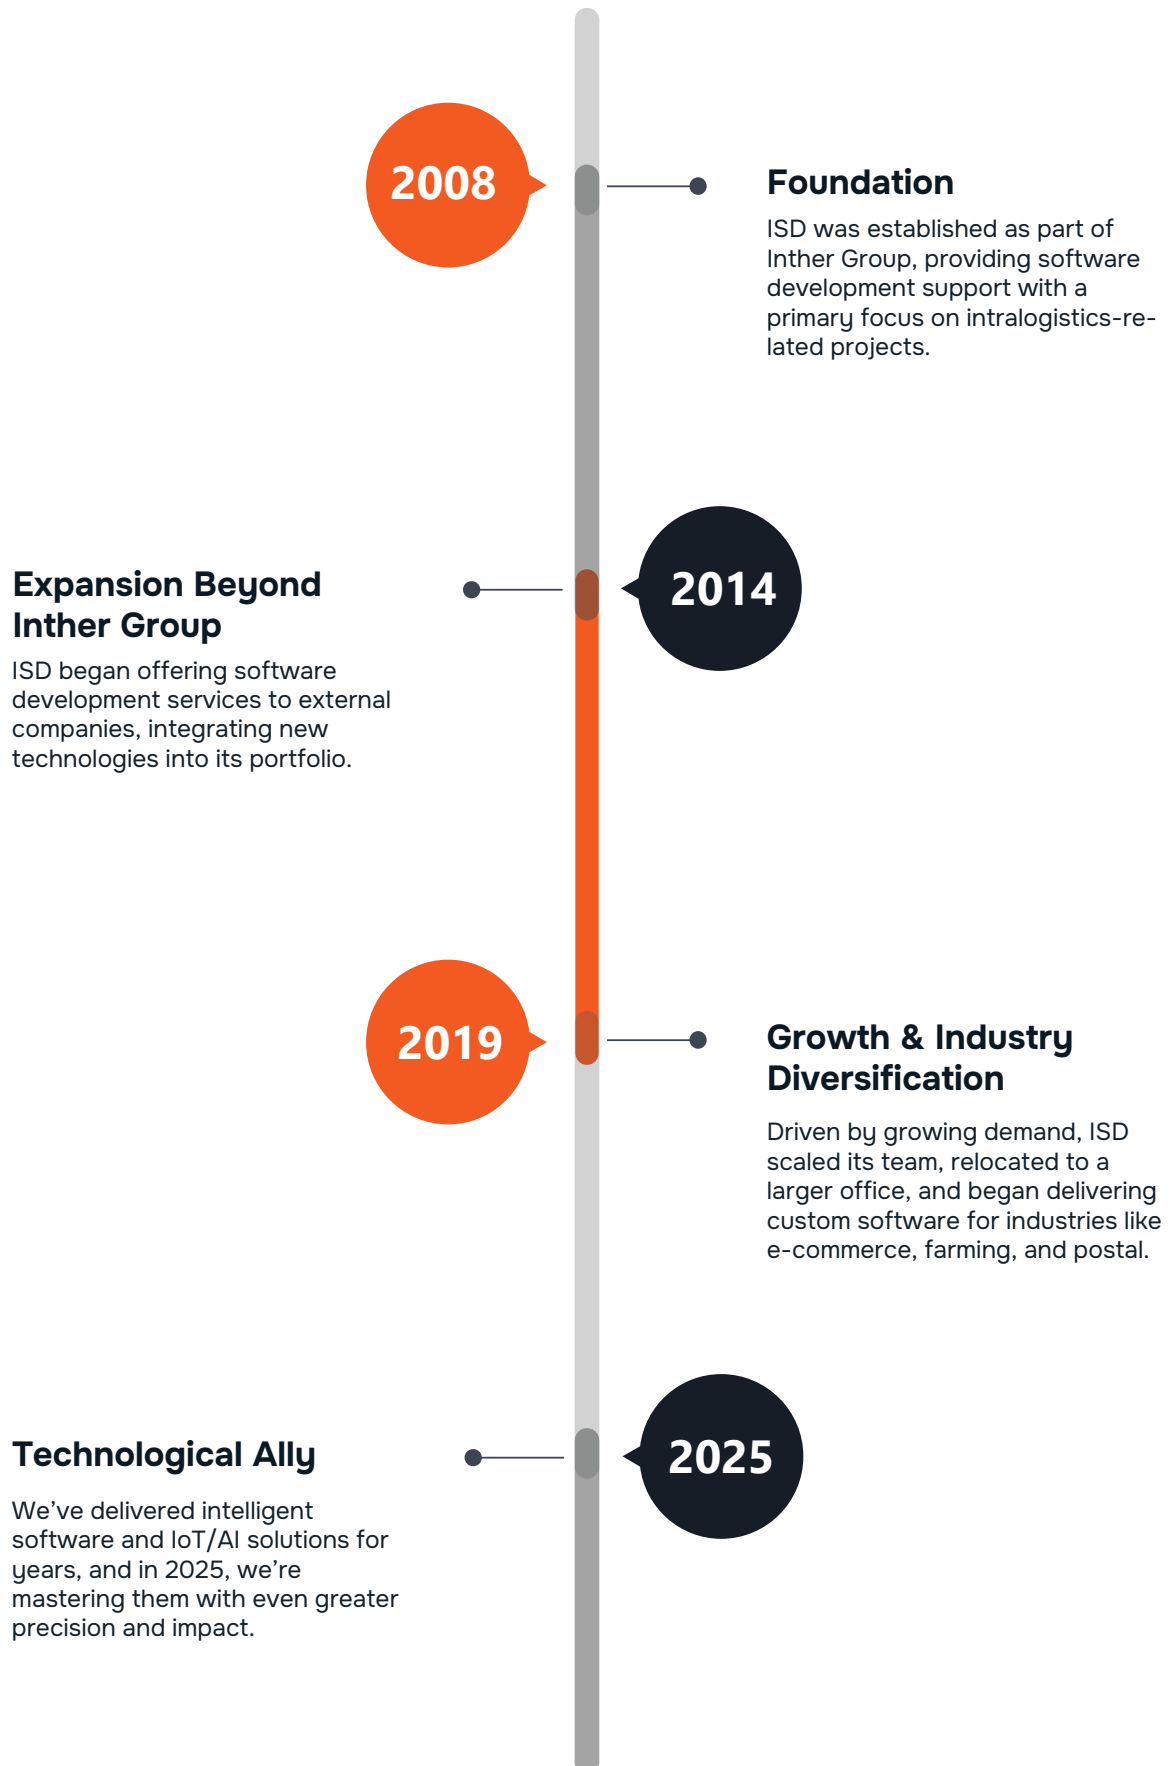

OUR MISSION

We foster an environment that empowers individuals, nurtures continuous learning, and drives self-development, ensuring we deliver maximum value to our customers.

OUR VALUES

Integrity, Competence, Empowerment, Togetherness

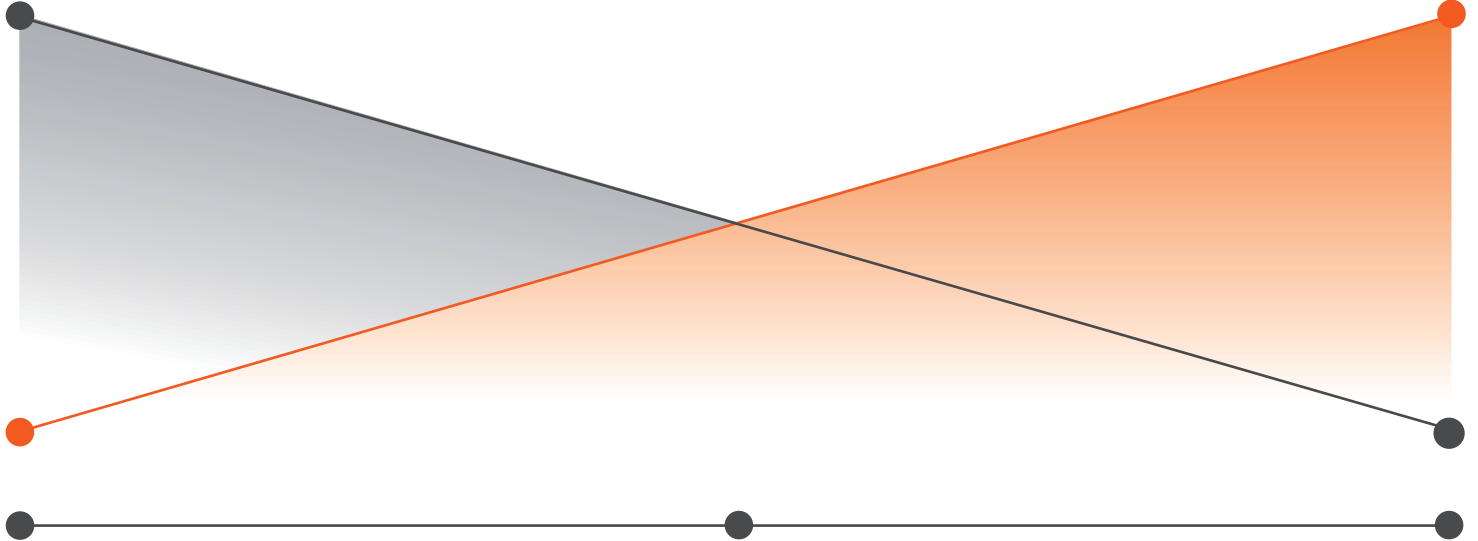

CUSTOMER

Management Effort & Risks

ISD

Management Effort & Risks

01

EXTENDED TEAMS

Need to scale your development team? With our team extension model, you get ISD specialists onboard while keeping full control.

Customer keeps primary management control.

02

DEDICATED TEAMS

Need a fully committed team? We build a dedicated crew of developers, QA engineers, PMs, and DevOps experts who work exclusively on your project, sharing responsibility with your in-house team.

Shared delivery and management responsibility.

03

END-TO-END SOLUTION

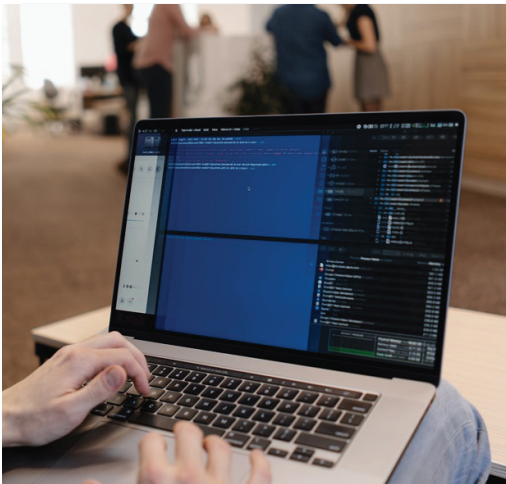

Looking for a hands-off development approach? With our fixed-budget model, we take full ownership of the process - from planning to delivery - so you can concentrate on business.

ISD owns the process and delivery outcome.

AUTOMATION PROJECTS

Automatization of intralogistics and warehouse management processes.

DIGITAL TRANSFORMATION

Integrating digital technologies to improve business operations.

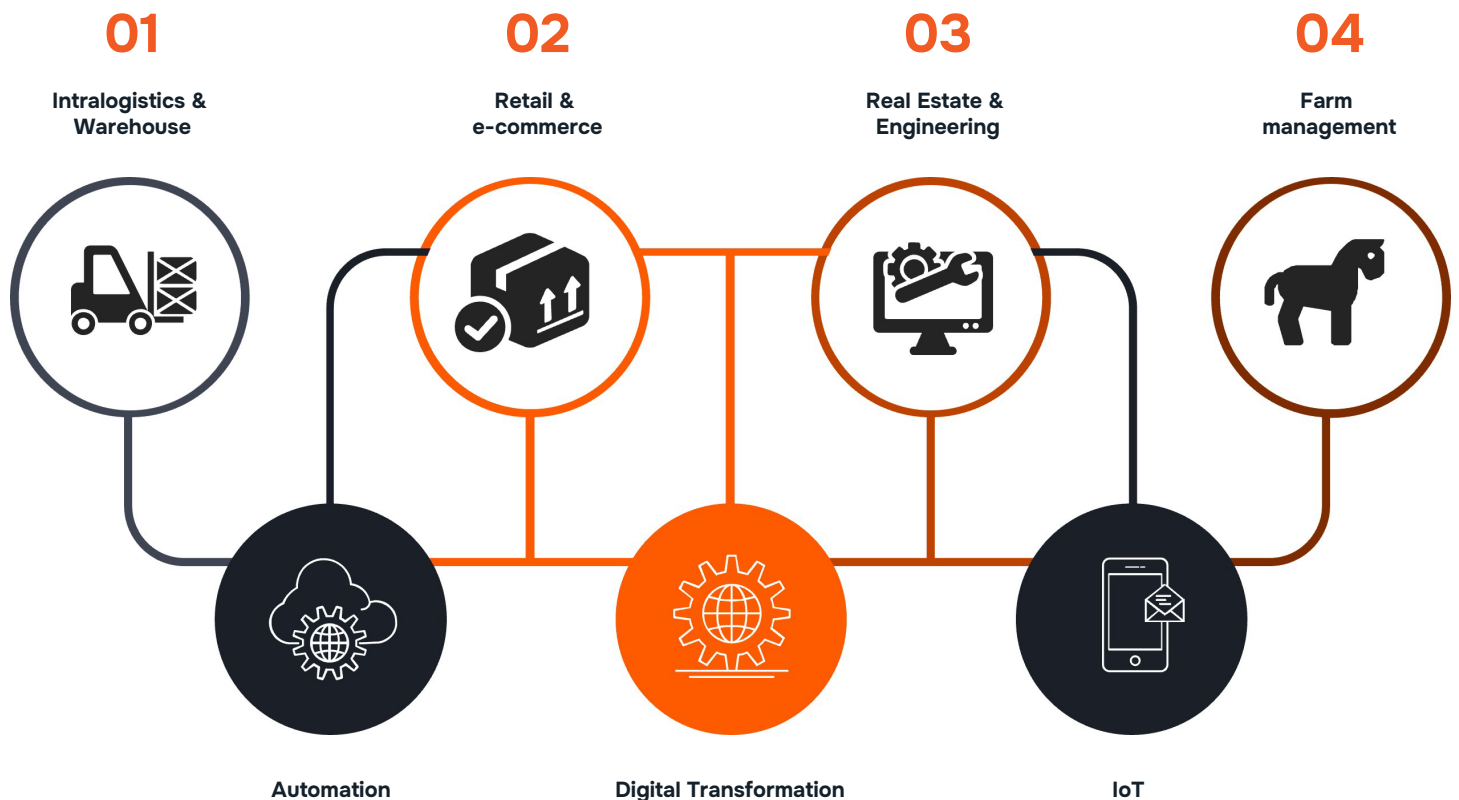

INTERNET OF THINGS

Improving efficiency in processes and collect data quickly.

With 18+ years of experience and 100+ successful projects, ISD delivers customized automation, digital transformation, and IoT solutions.

We drive efficiency and innovation across intralogistics, retail, real estate, engineering, and farm management, enhancing operational workflows and business performance.

LUNAJETS

Michael Heerkens

CIO, HelloPrint

“

At Helloprint we aim to make ordering print easier for all our customers. With our partnership with ISD and having Ivan in our team we are very happy that we come closer to this goal day by day.

Twan Claessens

CEO, Piglets Treatment System

“

Working with the ISD team is great! The key to successful software is a team that can make a bridge between business and technical needs, and this is exactly our case.

Raoul Huisman

CTO, Humble Buildings

“

During the first 1.5 years, we did not regret this choice at all. Quality of coding from the engineers, nicely integrated into our teams.

Jarno Eggink

Founder, Bold Digital

“

Forging excellence through unwavering partnership, embodying solidity, expertise, and unwavering commitment.

Paul Hermesen

Managing Director, Inther Group

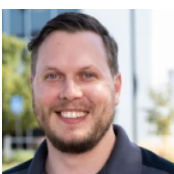

Throughout the years the ISD team has shown great flexibility in many internal and external projects - not only in software-related projects, but also in areas like service, PLC and engineering. And always you feel the tremendous dedication and enthusiasm of the Moldovan team.

Tony Smits

Manager Software & Controls, Eurosort

I'm really satisfied with their way of working and determination. They understand the software quickly and commissioned the machine with a clear plan in mind.

Nathan Belcher

VP of Operations, East Coast

During our time working with Inther, Adrian has been an invaluable asset in setting up our automation solution. This is a groundbreaking project, integrating various types of automation to deliver a solution that has never been seen before. We could not have gone live with this automation without Adrian's direct involvement. Adrian is extremely knowledgeable, hardworking, and excels in training team members on proper processes and procedures. He brings a level of professionalism and support that greatly impressed me. Whether working on auto-baggers, A-frame motors, automated sorters, or calibrating cameras, Adrian consistently found solutions and was always the first to jump in and work until issues were resolved.

Technical & Business Alignment

Beyond technical excellence, our developers excel in communication and strategic thinking, ensuring smooth collaboration with partners and seamless integration into enterprise environments.

Knowledge-Sharing & Collaboration

We actively collaborate with leading academic institutions and industry partners, delivering lectures and mentorship programs that bridge education.

Industry-Certified Experts

Our developers are certified in the latest 2025 technologies, including AI-driven cloud solutions, Kubernetes, Microsoft Azure, AWS, Google Cloud, and advanced cybersecurity.

Innovation-Driven Mindset

We foster a culture of continuous learning and teamwork, enabling us to adapt to evolving business challenges and deliver scalable solutions.

WHY CHOOSE AN ISO 27001 SOFTWARE PARTNER?

At ISD, security is not an afterthought - it is at the core of our development process. With ISO 27001 certification, we deliver resilient, compliant, and future-ready digital solutions.

Data Protection You Can Trust

Your sensitive business information is securely managed with industry-leading encryption, controlled access, and compliance with GDPR & NIS2.

Guaranteed Business Continuity

With real-time threat detection, incident response, and continuous security monitoring, we help prevent downtime and ensure seamless operations.

Minimized Cyber Risks

We embed security into every stage of software development, eliminating vulnerabilities that could expose your operations to cyber threats.

Compliance Without Complexity

Navigating security regulations can be challenging. Our team ensures full alignment with global and industrial compliance standards, simplifying audits and reducing risks.
